

Fabric tension frames

Awake emotions -

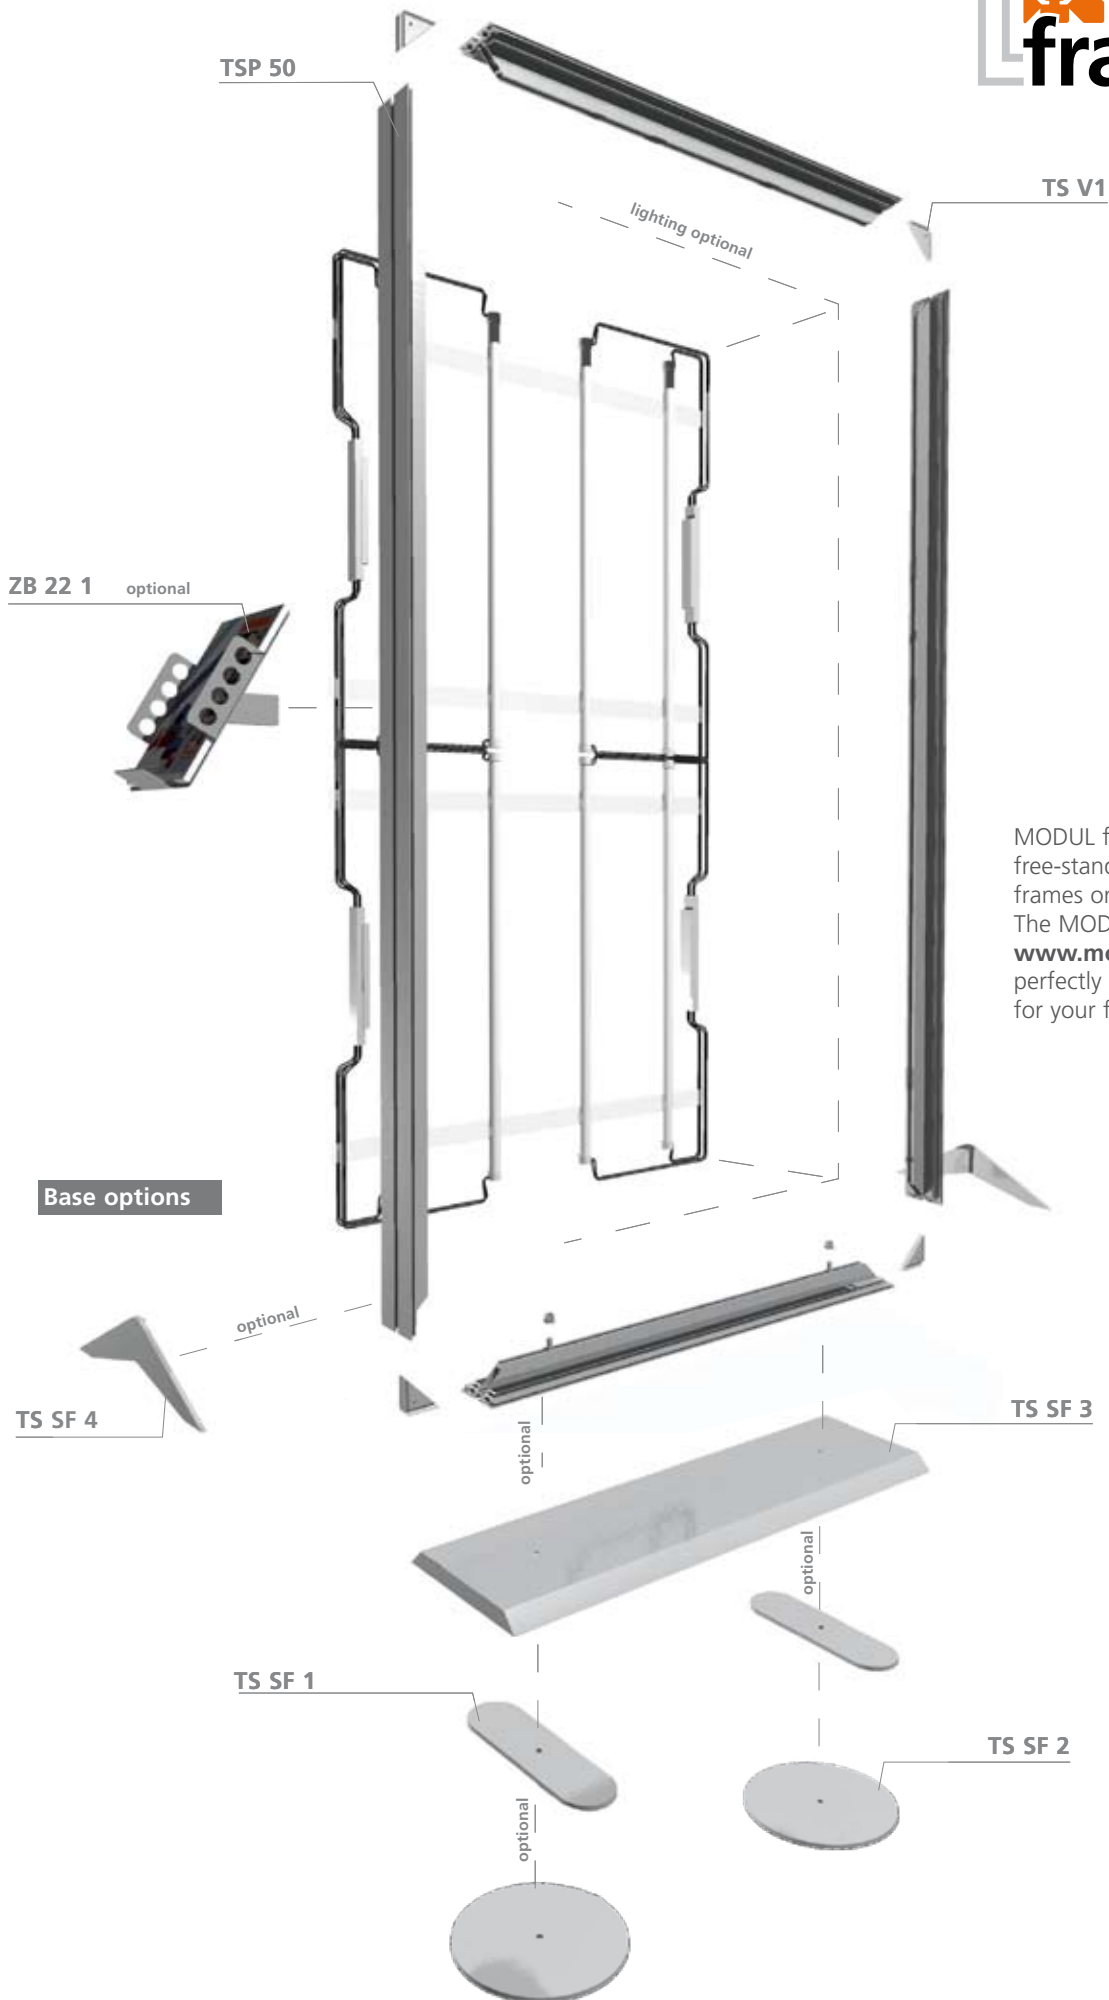

Create atmosphere in showrooms, lounges or individual exhibition spaces with ease through the use of fabric tensioning profiles, wall connectors, lights and printed fabric infills.

Light effects – architecture – communication with the customer
MODUL fabric frames offer a wide variety of possibilities.

Atmosphere - quick and easy!

Flexible in height and width – lit or backlit, MODUL frames relay information to clients through large format graphics and create new dimensions of light and space.

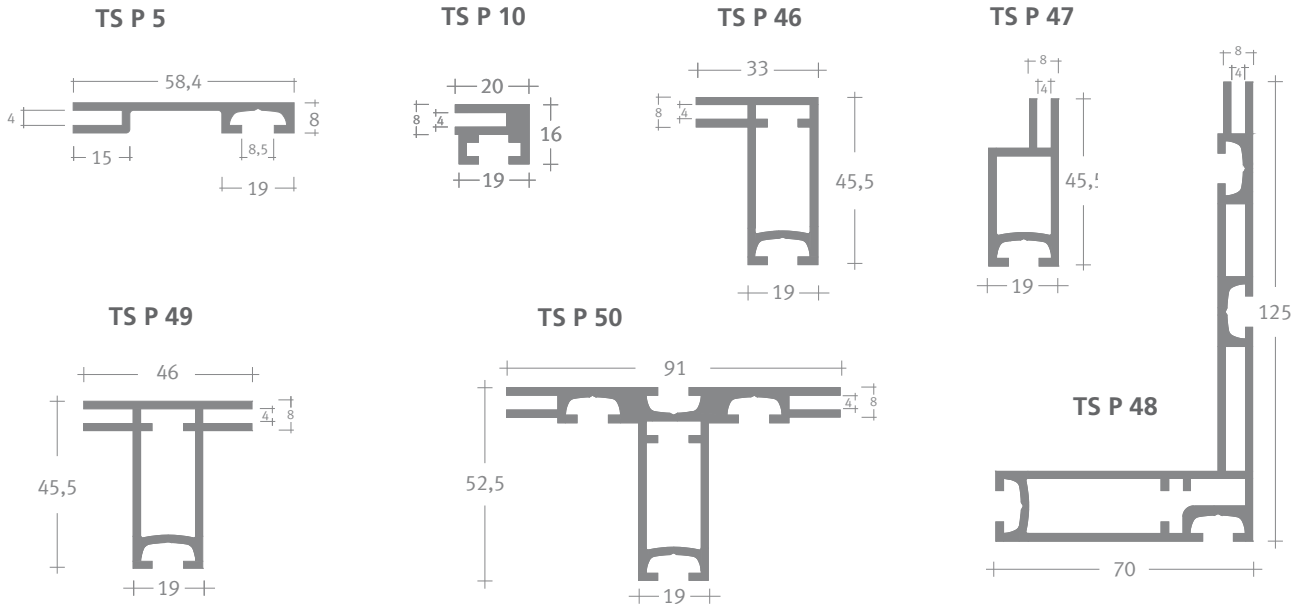

MODUL frames can be used as free-standing displays, wall-mounted frames or ceilings. The MODUL frame calculator at www.modulframe.com guarantees perfectly measured fabric graphics for your frames.

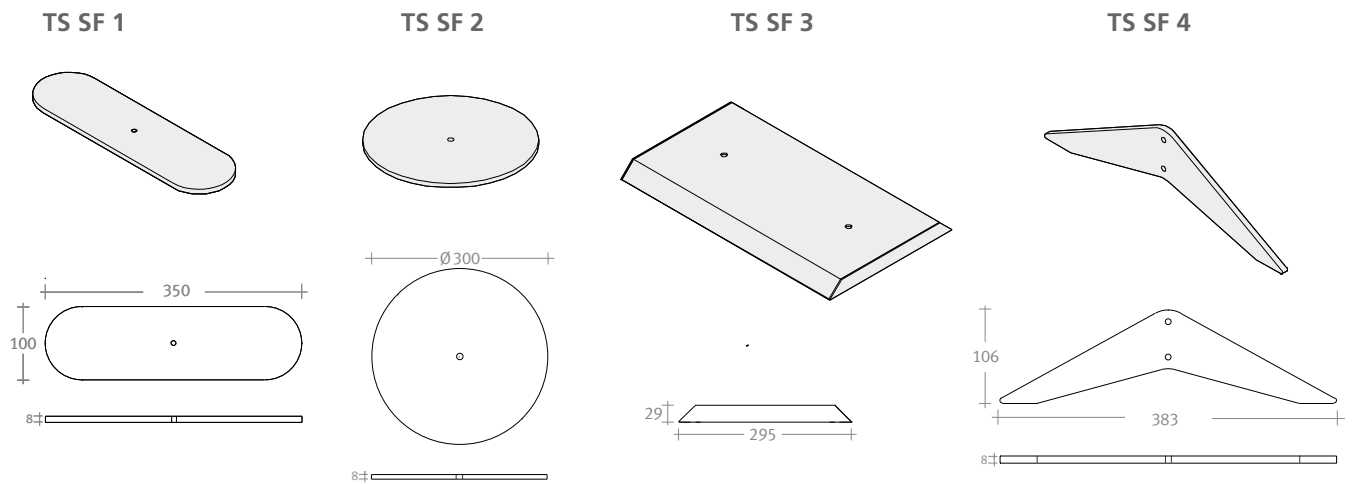

MODUL fabric frames offer you a wide variety of possibilities.

MODUL fabric tensioning profiles

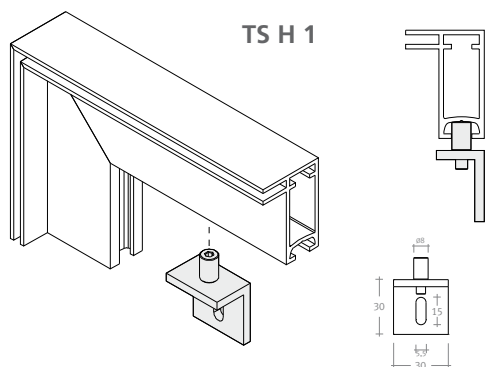

Silicone retainer profiles

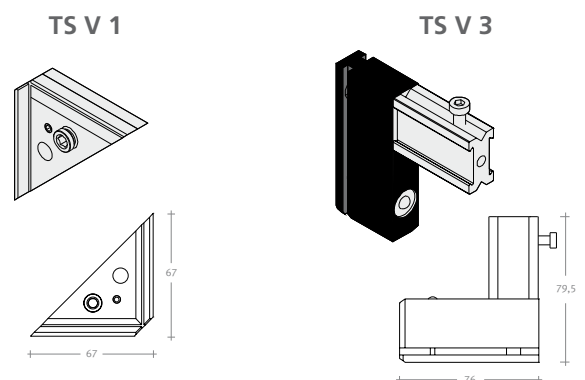

Base options

Wall brackets

Corner joints

All MODUL fabric retainer profiles are compatible with MODUL's classic profile range. Profile lengths of up to 6m. Special measurements and colours are available upon request.
