

Fabric profiles

State of the Art - create eye-catching silhouettes and spectacular sculptures with a minimum range of components.

Transparency wins

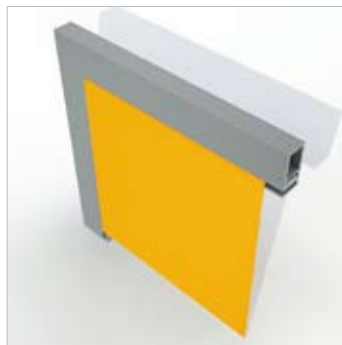

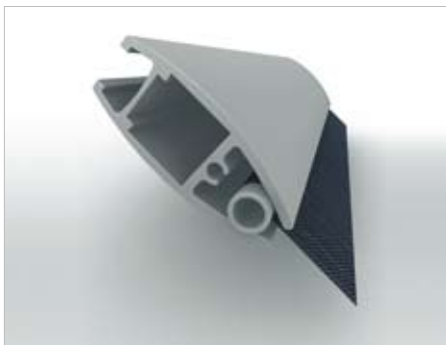

MODUL's fabric tension and retainer system components: Suspended freely over the heads of the fabric banners transport printed and pictorial messages.

Printed fabrics for a higher communication

ation level and ambience ...

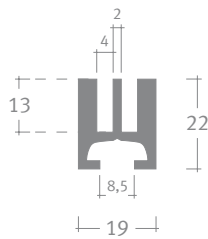

New trends call for higher technical features and that is why MODUL's newly developed fabric tension and retainer profiles are the perfect choice to make. Perfectly designed and immaculately constructed, they fulfil all functions within the exhibition and event industries. The use of fabrics leave no questions unanswered – accept the challenge.

MODUL's range of fabric tension and retainer profiles offer an endless compilation of printed textile possibilities.
